BOOK SYNOPSIS

Professor Allan J. Lichtman, who has correctly forecasted thirty years of presidential outcomes, makes the case for impeaching the 45th president of the United States, Donald J. Trump. In the fall of 2016, Distinguished Professor of History at American University Allan J. Lichtman made headlines when he predicted that Donald J. Trump would defeat the heavily favored Democrat, Hillary Clinton, to win the presidential election. Now, in clear, nonpartisan terms, Lichtman lays out the reasons Congress could remove Trump from the Oval Office: his ties to Russia before and after the election, the complicated financial conflicts of interest at home and abroad, and his abuse of executive authority. *The Case for Impeachment* also offers a fascinating look at presidential impeachments throughout American history, including the often-overlooked story of Andrew Johnson's impeachment, details about Richard Nixon's resignation, and Bill Clinton's hearings. Lichtman shows how Trump exhibits many of the flaws (and more) that have doomed past presidents. As the Nixon Administration dismissed the reporting of Bob Woodward and Carl Bernstein as "character assassination" and "a vicious abuse of the journalistic process," Trump has attacked the "dishonest media," claiming, "the press should be ashamed of themselves." Historians, legal scholars, and politicians alike agree: we are in politically uncharted waters—the durability of our institutions is being undermined and the public's confidence in them is eroding, threatening American democracy itself. Most citizens—politics aside—want to know where the country is headed. Lichtman argues, with clarity and power, that for Donald Trump's presidency, smoke has become fire.
